

# **10<sup>th</sup> FAI Junior World Gliding Championships**

Pociūnai, Lithuania

Team Captains Briefing

2017-07-25

# FLARM:

- **The installation and use of a proximity warning system (FLARM) is mandatory. OGN registration is required as well. At technical inspection competitors will be required to demonstrate, that the Flarm device is operational. The Flarm must remain operational during all flights in order to improve safety. The organiser will use a range of checking procedures to verify, that Flarm transmission and reception is functioning. This may require pilots to submit a Flarm trace or validation from Flarm radar. A percentage of competitors (randomised daily) may be required to submit evidence on each day to show that their Flarm transmission and reception is functioning. Non-functioning Flarms may be penalized as a safety breach. First offence a warning, subsequent breaches (n-1) X 25 points.**

# Tracking

## Tracking system from Flarms

- Tracking can be found:  
<http://glidertracker.de>  
<http://live.glidernet.org>
- New site (under construction now):  
[jwgc2017.onglide.com](http://jwgc2017.onglide.com)
- Identification of Flarms at:  
<http://ddb.glidernet.org/>

# Technical control

07-26
